

Live Location Tracking for Electronic White Lining (EWL) Navigation Guide

- 1 Using the **Toggle Map** view within **Ticket Search**, select the **Current Location** text.

Zoom to: [Current Location](#) [Tickets](#)

The map will then zoom in and center around your current **GPS** position 

Also displayed will be any **Notification Polygons** for tickets associated with your account in that same view level.

OR you can click on the **Enable the Position to Current Location** symbol  for the same view based on your **Current Location** – The symbol is highlighted in green when enabled .

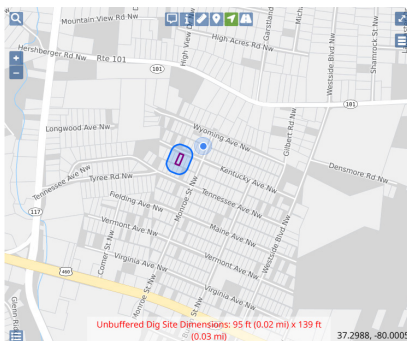

As your position changes, it will reflect accordingly on the map.

To stop tracking the location, click on the **Stop Tracking Location** text.

Zoom to: [Stop Tracking Location](#) [Tickets](#)

OR you can click on the **Enable the Position to Current Location** symbol  to disable it. The symbol will return to the default color when disabled .

- 2 If inquiring on a request, you can click on the **Enable the Position to Current Location** symbol  within the **Map** section, to show your current position  in relation to the ticket's **Notification Polygon**.

As your position changes, it will reflect accordingly on the map.

To stop tracking the location, click on the **Enable the Position to Current Location** symbol. the symbol will change from  to  when disabled.
